

## **SR-808 Audio Intercom System**

Functions: intercom, unlocking, password for multi households, compatible with any kind of electronic lock, magnetic lock, etc..

### **Features:**

1. Stainless steel or aluminum alloy panel.
2. System suitable for the high and multi-storeys buildings.
3. Stainless steel buttons with light.
4. 6-wire door phone system can work normally even if short-circuit occurs.
5. MCU intelligent controlling and short-circuit automatically self-inspection reduces the cost of maintenance.
6. Circuit is double-sided patch and moisture proof with high reliability.
7. Any outdoor unit can be expanded with access control and compatible with the audio phones.
8. Several unlocking passwords available to set.
9. It can revise all the parameters like ring type and unlocking time by keyboard adjustment.
10. All kinds of electronic lock, magnetic lock etc for the system.
12. Special hands-free intercom circuit design provides voice without squeal.

## Outdoor Unit of Building Audio Door phone System 808 Series

### Audio Door phone( Outdoor Unit )

#### **SR-808DA11**

Embed dimensions: 252×113×33mm

Installation: surface/flushed mounted

**System capacity:** Each outdoor unit can support 99×4=396 indoor unit(apartments)

### Audio Door phone (Indoor Unit ) **SR-808DF**

Power: provided by system

Ring≥70db

Outline dimensions: 188×87×62mm

Installation: surface mounted

Function: intercom, unlocking

### Power supply

Input: AC120V

Output: DC12V/5A

Outline dimensions: 260×165×72mm

Installation: surface mounted

Each power supply support one outdoor unit.  
can support 99 decoders.

### Decoder **SR-808V4 II**

Max connection with 4 indoor units

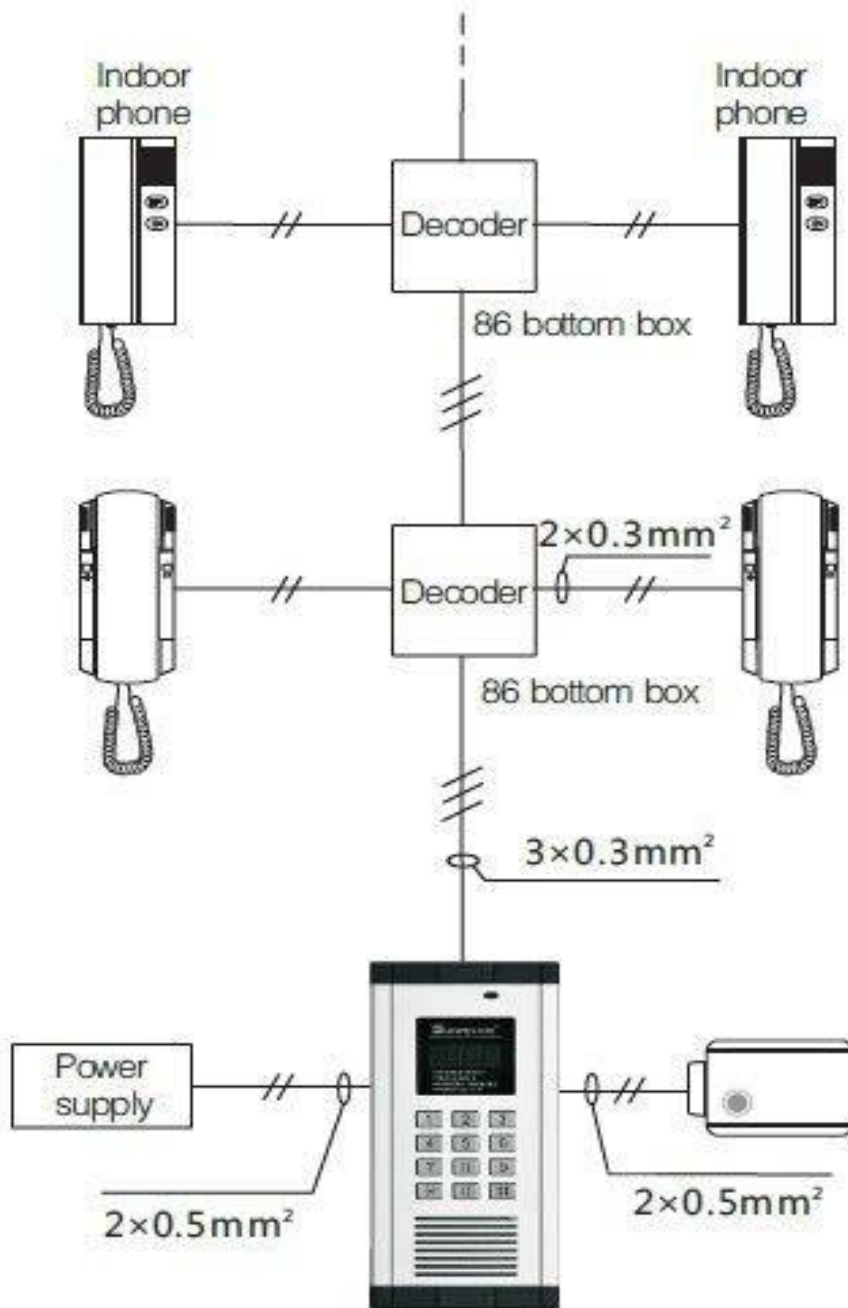

Power: mainline providing

Power consumption: 0 mA/20mA

Installation: surface mounted

Outline dimensions: 86×86mm
